CANCER, Drumheller, Alta.

Len Hay is a patient in the Holy Cross hospital.

Mrs. Levins and Mrs. Cadman were visitors at the home of Mr. and Mrs. C. Cave.

Mr. and Mrs. Gordon McLeod of Edmonton were holiday visitors at the A. J. McLeod home.

Barry Hunt spent a few days at the home of his grandparents Mr. and Mrs. Harry Hunt.

J. F. Ohlhauser was rushed to Drumheller, having got kalsomine in his eye, which was very painful.

Mrs. E. Smith of Wayne, formerly of Carbon, is visiting a few days at the home of her grandson Doug Prowse.

Mr. and Mrs. Wm. Douglas Jr. and baby were Good Friday visitors at the home of his parents Mr. and Mrs. Wm. Douglas.

Mr. and Mrs. Wm. Douglas and boys of Lacombe were visiting at the home of their parents Mr. and Mrs. Stan Torrance.

Mr. and Mrs. Earl Lambert (nee Irene Martin) and girls of Edmonton were holiday visitors at the home of their parents, Mr. and Mrs. Otto Martin.

The regular meeting of the Home and School was held on Thursday, April 5th with Pres. Leo Trepanier in the chair. The meeting opened in the usual manner. The Secretary was not able to attend owing to road conditions. Mrs. Mary Prowse then took minutes for the meeting. The Blood Donor Clinic was announced at Acme on April 11th from 12:30 to 3 p.m.

The Graduation Banquet was discussed and tabled till the May meeting. The Entertainment Committee then led a wonderful group panel which was very interesting. Business over, Mrs. Prowse moved the meeting adjourn. Lunch was then served by the hostess.

SEEDS — GRASS — GRAIN

Once more we are pleased to serve you with your requirements for grass seeds, but it would be advisable to get your supply early as there is a very limited supply of some varieties. Prices are as follows, F.O.B. Linden:

Brome, No. 1.....\$23.00 cwt.
Alfalfa Ladak, No. 1 \$37.00 cwt.
No. 2.....\$34.00 cwt.
Alfalfa Grimm No. 2 \$29.00 cwt.
Sweet Clover white No. 1 \$16.00
No. 2.....\$14.00 cwt.
Sweet Clover yellow No. 1 15.00
No. 2.....\$14.00 cwt.
Alsike No. 1.....\$25.50 cwt.
Fescue,
Creeping Red No. 1 \$24.50 cwt.
Crested
Wheat Grass No. 1 \$35.00 cwt.
Other prices available upon request.

The grain offered to us for hoists, machinery and appliance deals enables us to supply you with most of your requirements for seed grain or feed.

Myrna Schell, who is at present training in the Holy Cross hospital, was a holiday visitor at the home of her parents, Mr. and Mrs. Gottlieb Schell.

Mr. and Mrs. Dusty Poxon, Mr. and Mrs. Wilfred Poxon took in the Mixed Bonspiel being held this week in Calgary. They returned home on Wednesday evening.

Obituary

CHRISTIAN C. PERMANN

Aresident of Carbon district for the past 35 years, Christian C. Permann passed away March 27th in Drumheller hospital at the age of 74 years.

He leaves to mourn his loss, his wife, Christina of Carbon; nine sons, Jacob, Carbon; John, Calgary; Paul, Hesketh; Sam, Drumheller; Benny of Calgary; Ted Schmidt and John Schmidt of Carbon; Emmanuel Neher of Beiseker; eleven daughters, Ernestine Tetz, Red Deer; Emma Hector, Freda Rempfer, Ella Musiko, all of Carbon; Ida Rempfer of Torrington; Emma Ginger of Bircham; Ella Bettcher and Edna Kranzler of Carbon; Martha Gieck of Swalwell; Kay Bettcher of Drumheller; Alma Hoffman of Morris, Manitoba; one brother, Fred of Solby, S. Dakota; 73 grandchildren and four great-grandchildren.

Funeral services were held from Carbon Baptist Church on

Saturday, March 31st at 2 p.m. with Rev. C. Miller and Rev. W. Effa officiating.

Pallbearers were Messrs. J. J. Ohlhauser, Karl Schacher, J. F. Ohlhauser, J. Raiser, G. Esslinger, Karl Schuler.

AJAX SEED OATS FOR SALE—Germination 95%. 80c per bushel. Certificate No. 55-2187.
—Steel Bros., Phone 9 or 303, Irricana.

SEED BARLEY FOR SALE—Montcalm, 90c bushel bin run. Vantage 90c bushel bin run.
—M. S. Page, 5 miles west of Sunnyslope.

10 DAYS between PROFIT and LOSS

Ten days ago the grain stood straight and promising in the fields. Then the temperature dropped . . . and the crop bowed to its greatest enemy—frost.

Ten days—your earlier harvest bonus from fertilizer—would have made the difference between profit and loss from frost-killed grain. Elephant Brand high analysis fertilizers, rich in nitrogen and phosphorous plant food and "tailor-made" for the Canadian Prairies, brings grain crops to maturity faster . . . a harvest up to ten days earlier.

GARDEN NOTES

Catalogues advise where plants or shrubs grow best

Humorists suggest that the pictures in the catalogues often excel the results in the garden. If this is so, the blame can often be laid at the door of the gardener, because he didn't study the catalogue well enough.

Practically all catalogues, in addition to giving specific planting instructions, indicate whether a particular plant or shrub is hardy or only semi-hardy in different geographic areas, whether it grows best in sun or shade; whether it likes heavy or light soil, or has a preference for wet or dry places in the garden.

With this information available there is no reason why the amateur gardener cannot arrange his plantings in such a way that they will grow to best advantage. He knows that he has put the right plants in the right places and proper attention and care throughout the growing season will bring satisfactory results.

Most from vegetables

A lot of gardeners have learned that the only way to get top quality in vegetables is to grow them at home. The reason is simple. Most vegetables, and especially things like peas, corn, beans, carrots and even spinach start to deteriorate within a few hours after they are picked. No matter how carefully we pack them, they soon start to lose some of their garden freshness. Because this is so, many people even with tiny gardens try to have a small plot for vegetables tucked away somewhere. And it is literally amazing how many good meals can be produced from a bit of land only a few yards each way.

Where the garden is a small one, we won't try to grow our winter's supply of potatoes, or very much of the bulky things like corn and squash. But even a 12 foot row of beans, spinach, carrots or beets will produce a lot. Most of these things can be grown in rows only a few inches apart and we can get more out of the plot by alternating rows of the bigger things like carrots, beets and beans with smaller things like lettuce, radish and onions. We can also have two crops, one early and one late, and we can spread out the sowings so that something fresh and new will always be coming along.

Add mystery

An interesting garden is like a winding lane, it should unfold on the visitor gradually. Even if space is limited to the standard urban back lot, it is possible with, perhaps a curving path, clumps of tall annuals or shrubbery to hide some interesting and intriguing corners and shady spots. Here we place a couple of chairs or a bench or a bit of wall or hedge.

But a curving path without any reason at all for the curve looks artificial. So we make that path wind around a tree, or a big clump of shrubbery. And every yard we proceed down that path there should be a different view, a flower bed or some other feature that cannot be completely seen from the back porch or the gate.

It is not difficult at all to add a bit of mystery, to keep some special corners almost hidden and with the amount of planting material we have available in Canada one can do wonders in creating a garden that is different from any other and reflects ones individuality.

PATENTS

AN OFFER TO EVERY INVENTOR. List of inventions and full information sent free. THE RAMSAY COMPANY, Registered Patent Attorneys, 273 Bank Street, Ottawa, Canada.

Your best roofing buy Economy Grade Cedar Shingles

Here is real roofing economy—without a sacrifice in quality! Red Label Certigrade cedar shingles are today's best roofing buy. They provide you three full thicknesses of genuine cedar on your roof. Whenever you require cedar shingle roof quality—combined with economy—ask your dealer for Red Label Certigrade cedar shingles.

FREE! Send coupon for these three helpful booklets.

Quick Canadian Quiz

1. What fur is the principal product of Canada's fur farms?
2. Which province normally has the largest cash income from the sale of farm products?
3. How large is Canada's Eskimo population?
4. In the U.S. one worker in four is directly employed in the manufacturing industry. What is the proportion in Canada?
5. Which has the greater value, Canada's annual wheat crop, or the annual output of the primary textile industry?

ANSWERS TO QUICK QUIZ

5. Primary textile production. 3. Between 9,000 and 10,000. 1. The mink. 4. Manufacturing now employs same proportion of workers in Canada as in U.S. 2. Ontario, with Saskatchewan normally second.

(Material supplied by the editors of Quick Canadian Facts, the pocket annual of fact material about Canada.)

JAY WALKER, SENIOR

Elderly people often constitute a traffic hazard, not only to motorists but also to themselves, when they ignore traffic lights and signals in crossing busy streets. They often walk out onto highways from behind parked cars into the stream of approaching traffic. They may not wish to advertise the fact that they are slow in movement and perhaps a little nervous, but extra care on their part is necessary, if they are to live the extra years that aged people can now enjoy. An aged person should wait until the policeman or traffic signal indicates a clear passage; if there are no such traffic regulators, it is best to wait until the road is clear or until several other people are crossing. That few minutes' wait may mean a longer lifetime.

WIDE EYES

The eyes of a shrimp are farther, proportionately, from its head than are the eyes of any other animal.

12-INCH SQUARES

Heirloom beauty in filet crochet rose squares

by Alice Brooks

Heirloom beauty in filet crochet! Rose squares—make a magnificent bedspread, tablecloth!

Just ONE square (12 inches in string) makes a stunning place mat! Smaller too, in No. 30 or No. 50 mercerized cotton. Pattern 7120: crochet chart, directions.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department, Department P.P.L., 60 Front Street W., Toronto

Be sure to write plainly your Name, Address and Pattern Number.

Order our ALICE BROOKS Needlecraft Catalogue. Enjoy pages and pages of exciting new designs—knitting, crochet, embroidery, iron-ons, toys and novelties! Send 25 cents for your copy of this wonderful book now. You'll want to order every design in it!

Elimination of back alleys is new trend

The trend is to dispense with alleys in new subdivisions, according to the American Society of Planning Officials.

Alleys have been criticized as health hazards and as the cause of needless expense, the society said.

At least nine cities have written new subdivision regulations prohibiting alleys and providing easements instead, a check showed.

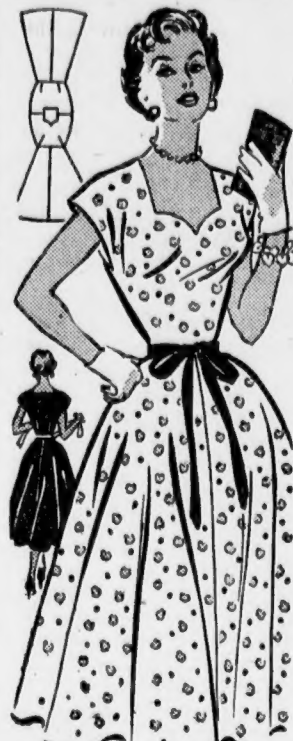

Some cities, including Detroit, Mich., are encouraging property owners in older districts to eliminate alleys and are advising them on how to do it.

The society said most arguments against alleys stress that they are expensive and a nuisance to maintain. More often than not they are littered with trash and garbage and make excellent breeding places for rats.

But the society said alleys are sensible where lots face on a major thoroughfare or in apartment house districts.

Sew it in a day!

4553

12-20; 30-42
by Anne Adams

Look at the diagram—even a beginner can whip up this honey of a dress in a day! FEW pattern parts, minimum details—a world of style! Curvy neckline, fitted bodice and flared skirt are so smart, s-o-o flattering! Choose cotton, linen, cool nylon print.

Pattern 4553: Misses' Sizes 12, 14, 16, 18, 20; 30, 32, 34, 36, 38, 40, 42. Size 16 takes 3½ yards 39-inch.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style number and send orders to:

Anne Adams Pattern Dept., Department P.P.L., 60 Front Street W., Toronto

Our hours are not for birds

"Our hours," said a nature student, "are nothing to the birds." Why, some birds work in the summer 19 hours a day. Indefatigably they clear the crops of insects.

"The thrush gets up at 2:30 every morning. He falls to work at once, and he never stops till 9:30 at night. A clear 19 hours. During that time he feeds his voracious young 206 times.

"The blackbird starts work at the same time as the thrush, but he lays off earlier. His whistle blows at 7:30, and during his 17-hour day he sets about 100 meals before his kiddies.

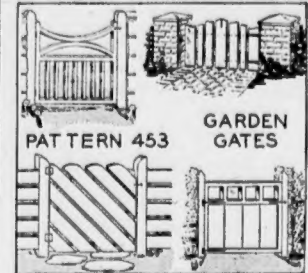

"The titmouse is up and about at three in the morning, and his stopping time is nine at night. A fast worker, the titmouse is said to feed his young 417 meals—meals of caterpillar mainly—in the long, hard, hot day."

Leukemia, a type of cancer that attacks the blood, in its acute form afflicts most often the young.

YOURS TO MAKE

An attractive front gate; blanket chest

The four gates shown above are all designed for use with fences of contrasting material such as brick or stone walls; hedges, metal or wood of special dimensions. Gates and fences that are selected to harmonize with the landscape and style of architecture can add charm to the homestead. Pattern 453 is 35c by mail. Another pat-

tern which is 38c contains directions for making and erecting 18 different styles of low fences with gates to match is available by mail for 35c. This pattern is also included in the Homestead Improvement Packet No. 2, priced at \$1.50 postpaid. This packet contains four other important improvements which the weekend builder can make.

If you like to make reproductions of Early American pieces, this chest should appeal to you. Note the giant size dove-tails for the corner joints. These are rugged and give the piece character. The weekend cabinet maker who makes one of these chests today enjoys an advantage over the original maker. Now the dove-tails are laid out by tracing from an actual-size pattern. Pine was used for the original but any close-grained wood that is not too hard would be good. Pattern 397 is 35c. Also available is an Early American Packet containing standard size patterns for five other authentic pieces. Packet price is \$1.50 postpaid.

Address order to:

Home Workshop Pattern Service, Department P.P.L., 4433 West Fifth Avenue, Vancouver, B.C.

1,800 THUNDERSTORMS

Weather records compiled from all over the world show that in any given minute about 1,800 thunderstorms are in progress over the world.

Quick, Easy Way to Shrink Painful Piles

Here is a nice, clean, easy way to get real relief from the nagging distress of swollen, painful piles without the inconvenience of ointments, pile pipes or suppositories.

The secret is in taking just one small Hem-Roid Tablet, with water, two or three times a day. Works through effective INTERNAL action. Quickly eases constipation, relieves itching, soreness and pain. Helps shrink piles and permits them to heal.

Why suffer needlessly when Hem-Roid offers you so much. Get a package today. See for yourself how nice Hem-Roid is to use, how effective it is and how much more comfort it will quickly bring you. All drug stores. Low cost. Money refunded if you are not 100% pleased.

Makes a better cigarette

Historic 'Rock' legendary pillar of Hercules

MONTREAL. — Gibraltar, the second port of call of the Cunard liner Caronia's Spring Cruise, is one of the legendary Pillars of Hercules. It was created by the strong man of ancient Greece when he smashed the mountain chain that once connected Europe with Africa and formed the Strait of Gibraltar.

The historic rock, however, gets its name from the Moorish general Tarik, who captured it in 711 A.D. The Arabic word "Jabal" means a hill; hence, after he had captured the rock it was called "Jabal-al-Tarik," or the Hill of Tarik. In time this appellation was mispronounced into its present form "Gibraltar."

The Moors held Gibraltar for some 600 years, though the Spaniards made many attempts to capture it. There is a story about one of those sieges which suggests that warfare in the old days was a more polite and romantic business than it is today.

It appears that after the battle between the Moors and the Spaniards had continued for many days without any definite advantage to either side, Queen Isabella of Spain came to see the fray. She seated herself outside the Moorish citadel and made a vow that she would remain there until the Spanish flag flew over the citadel. The fighting was fierce and the sun unusually hot. The Moorish commander finally took pity on the Christian queen, so the story goes, and realizing that the gentle lady might have to sit there for months or break her oath, he gallantly hoisted a Spanish flag long enough for the queen to retire with dignity.

Britain acquired Gibraltar in 1704 and since then it has remained a symbol of British power. The great rock is often compared with a crouching lion, guarding the entrance to the Mediterranean.

CHECK ELECTRICAL EQUIPMENT

Many fires in homes and business premises are caused by faulty electrical wiring or appliances. This is often due to wiring or installation being done by non-qualified people or the use of materials not up to the standards of the Canadian Standards Association. All appliances or equipment which meet the requirements of the CSA have been thoroughly tested for fire and shock safety and accordingly bear the CSA approval mark.

The ancient Chinese invented gunpowder that was incendiary but not explosive. True gunpowder was invented about 1248 A.D.

On The Side : • By • E. V. Durling

The slyer sex

Many men believe women wager wildly at race courses. That they habitually play hunches. Females just pretend they wager that way. It is part of the act to make men feel smarter and superior. The ladies know what they are doing. I once heard a woman say as she triumphantly displayed a winning ticket on a horse named Ocean Lass, "I bet on it because I was born by the beach." Just before the race I had heard this same woman say to a companion, "Ocean Lass looks good. Finished only a length behind the winner last time and in better company." So that was the real reason she bet on the horse. Women are too fond of money to take a chance on losing it foolishly.

Matrimonial immunity

Frequently discussed has been the legal aspect of the matter of a wife appropriating money from her husband's pockets while he is sleeping. There has been a switch in this situation. A husband, with a career girl wife, has been accused of "stealing" money from her handbag. A legal authority says the law views a man and wife as one person. So, as you cannot steal from yourself, a husband cannot be accused of theft if he lifts some money from his wife's handbag.

Sentimental value

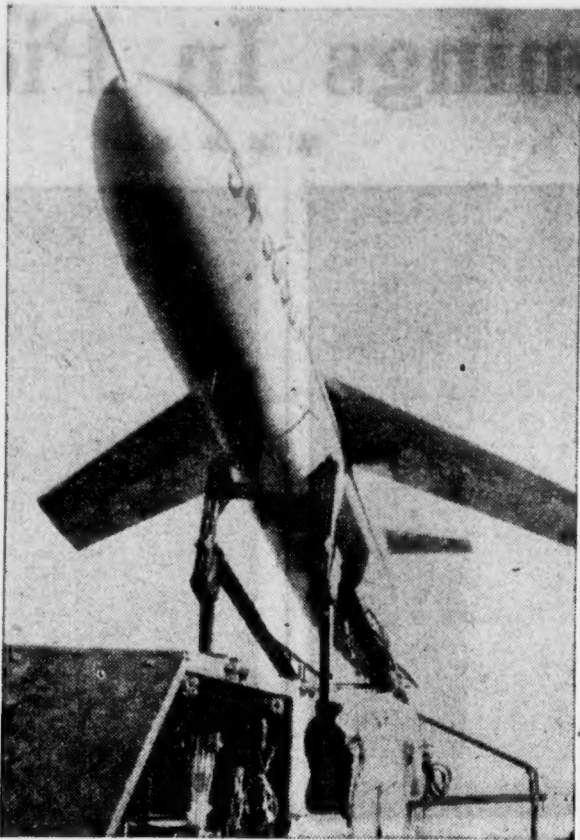

What is the highest price ever paid for a dog? Can \$30,000 be topped? That is what was offered for a British-owned Pekinese named Caversham Ku-Ku of Yam or "Ku-Ku" for short. Ku-Ku is, of course, a champion show dog. However, to its owner Ku-Ku is still a much beloved pet. The offer was refused.

Old rockin' chair never got him

What diet does your doctor recommend as an aid to longevity? Ask his opinion of a regular diet of cheese and onions, coarse bread, milk and mild ale. That was the diet of Thomas Parr, the Englishman, who lived to be 152. Parr led the life of a very gay bachelor until he was 80, when he married for the first time. However, he didn't completely settle down. When he was 105 his wife caught him stepping out with a lively brunette named Catherine Milton. After the death of his first wife, Parr married again when he was 120. At the age of 130 he was still doing a regular hard day's work. As mentioned, he died at the age of 152. He is buried in Westminster Abbey.

Behind the scene

"Our kitchen is open for inspection." That notice should be on the menu card of every restaurant. That would compel cleanliness. Many people wouldn't eat in the restaurants they do if they had a glimpse of the state of the kitchen and the manner in which the food is handled. Food poisoning is on the increase and much of it is due to dirty restaurant kitchens.

MISSILE TEST—Aircraft technicians at Holloman Air Force Base, New Mexico, prepare for a test firing of the Matador TM-61B tactical guided missile, new version of the Matador TM-61 missile now deployed with U.S. forces in Europe. It is longer, has larger nose section and will be equipped with new guidance system to make it even more deadly than the 650 m.p.h.-plus TM-61 Matador. Missile, the size and weight of a jet fighter, is fired from 39-foot mobile semi-trailer at left.

In case of fire

During the past few months, Canada has had a tragic series of fires in homes, with the resultant loss of many lives. Most laymen do not realize how quickly fire can travel or that even when the fire is apparently out, a thread of flame may be travelling under floors or through walls. Therefore, unless the fire is confined to some article and is easily extinguished, the fire department should be called in order to ensure that the blaze will not flare up again in another area to which it has travelled. Immediately a fire is discovered, everyone should be evacuated from a building. If there are important or valuable articles that must be rescued, they should be gathered up but only if there is obviously plenty of time. By keeping such valuables at all times where they can easily be grabbed up, time will be saved. Fires can usually be prevented if extra care is taken to have electrical wiring and appliances properly inspected; heating apparatus properly installed and maintained and care taken with matches, fuel and other materials that form fire hazards.

BE A COURTEOUS DRIVER!

Stomach goes out for dinner

Cornell University zoologists are trying to find out how a starfish sends its stomach out for dinner.

Prof. John Anderson, head of the Cornell research project, said a hungry starfish grapples with a clam or oyster, then pushes its own stomach out through its mouth into the open shell. Digesting a complete living clam in an hour or two, the starfish pulls its stomach back in, Anderson said.

One problem faced by the researchers, Anderson said, is how the starfish opens its prey's shell. One theory holds that the starfish gives off a poison to paralyze the clam's muscles. However, it is more commonly believed that the starfish merely overpowers the clam.

In 1830, the phosphorus discovered in 1669 was finally adapted to matches.

Vegetable milk and fish flour for undernourished children

Powdered milk derived from vegetables and from buffalo, fish "flour", and fluid or dried milk from more conventional sources, are now going to help feed undernourished children in all corners of the world as the result of the United Nations Children's fund (UNICEF) resourceful program to help set up food processing plants in countries lacking adequate facilities.

UNICEF has approved aid for a total of 165 plants of which 124 are already in operation in 27 countries in Europe, Asia and Latin America.

The majority of the UNICEF-aided plants—135 of the total—are or will be devoted to the processing of fluid milk. Twenty-seven others are designed for the production of milk powder, and one each will process baby food, "vegetable milk" and fish flour.

When all are in full operation some 4,000,000 children and expectant mothers and nursing mothers will benefit from free or low-cost food rations, according to UNICEF.

The "vegetable milk" plant is being set up in Indonesia. It will produce, in powder form, a drink for infants processed from soybeans, peanuts and malt, said to be inexpensive and plentiful in this non-dairy country where malnutrition among the children is severe. Due to go into operation within the next six months, it will serve as a pilot project for similar developments in other regions.

Chile, too, will manufacture a nondairy, high-protein food for children with the help of the fund. A UNICEF equipped pilot plant will process fish into a "flour" which can be baked into bread or stirred into gruel to enrich the diets of children through school lunch and other child-aid programs.

All other plants assisted by UNICEF to date will process milk—from the buffalo as well as the cow and the goat. The world's first plant for drying buffalo milk went into operation in Anand, India, just a few months ago. UNICEF contributed drying equipment and India set up pasteurizing and other processing facilities. New Zealand also aided the development with funds under the Colombo Plan.

Besides India, UNICEF is helping set up a plant to dry buffalo milk in Egypt and is arranging facilities for the sterilization of it in Iraq so that its purity may be maintained in the absence of re-

frigeration there.

UNICEF's role in this significant, worldwide dairy industry expansion, is explained, is to provide equipment not available locally to stimulate pioneering activity beyond the point where private capital can risk going.

Butt business booming for French 'expert'

PARIS, France.—Paris' oddest businessman was tracked down to his stall recently. The butt business, he announced, is booming.

Eugene—this is the only name the stocky 70-year-old entrepreneur will admit—is generally regarded by the city's tramps as a genius as well as a fine friend.

Eugene was offended at the suggestion that he was a tramp. He has a very regular job, he pointed out. He makes a living out of the millions of cigaret and cigar butts thrown away daily—and he does it with the virtuosity of an artist.

Eugene picks up nothing himself. He has a "staff" of "several hundreds"—cave waiters, bartenders, doormen and sweepers at theatres and depots.

After making collections, Eugene sorts the merchandise with the eye of an expert tobacco blender. Some butts he splits open, using the tobacco to make mixtures; others, he leaves as they are.

Rush hours at his stall are 10 a.m. to 5 p.m.

Buyers can take their choice of anything from four-inch corona cigars to Turkish, Egyptian, Greek, Russian cigarets and two-puff grade-C gaspers. For the top quality Eugene displays a card: "Guaranteed from the finest hotels and restaurants only."

Most of the tramps in Paris buy from Eugene at one time or another. But he also has a reputation to keep up, he said. Some of his choicest half-smoked cigars are bought by a taxi-driver who before the revolution was an authentic Russian prince.

Eisenhower to seek second term presidential history said "yes" he would!

By LEONARD J. SNYDER

(Correspondent for CPC)

WASHINGTON. — President Eisenhower will seek a second term.

History tells us that 24 of the 32 former Chief Executives sincerely desired to be elected a second time.

The most outspoken of the 24 was Theodore Roosevelt, who declared in 1903, "Of course, I should like to be re-elected President and I shall be disappointed if I am not . . . Any strong man fit to be president would desire renomination and re-election after his first term."

There were 13 presidents who ran for a second term and won. They were: Thomas Jefferson, James Madison, James Monroe, Andrew Jackson, Abraham Lincoln, U. S. Grant, Grover Cleveland, William McKinley, Theodore Roosevelt, Woodrow Wilson, Calvin Coolidge, Franklin D. Roosevelt, and Harry Truman.

Seven others were unsuccessful in their second-term bids. They were John Adams, John Quincy Adams, Martin Van Buren, James Fillmore, Benjamin Harrison, William Howard Taft and Herbert Hoover.

James K. Polk, James Buchanan and Rutherford Hayes wanted second terms but they failed to pursue their desires and contentedly passed out of the picture. George Washington not only opposed a second term for himself but remained steadfast in his op-

position until he was "drafted."

Chester A. Arthur wanted another term in the White House but was bitterly disappointed when his party failed to renominate him. Less than two years later he was dead.

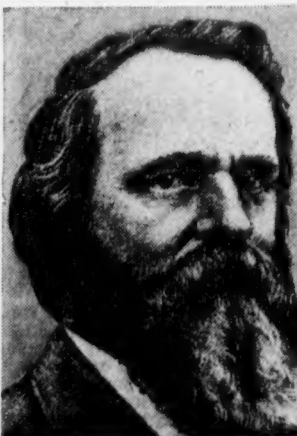

Buchanan, believing civil strife would be too much of a burden to carry on his presidential shoulders, told incoming President Lincoln, "If you are as happy, my dear sir, on entering this house as I am on leaving it, you are the happiest man on earth."

Before his first term was over Lincoln was convinced he would fail to win another. However, he said, "A second term would be a great honor and a great labor, which, together, perhaps, I would

not decline if tendered." In 1863, a year later, he "gratefully" accepted renomination.

John Tyler was 56 when he married a 23-year-old beauty. He wanted to keep his bride in the White House for four more years. However, the Whigs who had first elected him turned him down the second time. He turned to the Democrats, who did likewise, and finally bowed out of the race.

Wilson, like Tyler, took himself a bride when the question of a second term was on most people's lips. He didn't think it was time for a change either, but he said, "If you think too much about being re-elected, it is very difficult to be worth re-electing."

Rutherford Hayes wanted second term . . .

Eisenhower follows tradition.

LONG "PIPE TRAINS" like this are puffing out of Welland, Ontario, these days, hurrying west with big loads of pipe. The pipe cargo is on its way to British Columbia, where it will be used in a vast natural gas transmission and distribution system in greater Vancouver, and the Fraser Valley.

MIXED-UP KID?—Not at all. Gene Baker, Chicago 'Cubs' second sacker, combines skills of his track star days with high-fly practice at the University of Chicago gym, before leaving for spring training.

SURPRISE—It's a toss-up as to whether this mother penguin is more surprised by the cameraman or the newly hatched chick. An Adelle penguin, she's one of some 10,000 formally garbed inhabitants of the rookery on Ross Island in the Antarctic's McMurdo sound. A Navy photographer with the expedition preparing United States bases for participation in the forthcoming International Geophysical Year snapped this rare picture. Penguin mamas lay but one egg a year each.

CONTROVERSIAL FIGURE—Miss Autherine Lucy, whose attempt to attend classes at the University of Alabama touched off rioting, gets a request for a signature from an airman while signing autographs in Union Station following her arrival in Washington from New York by train.

DOG-GONE TOOTH — It's a dog's life for Tille, pet of the Ernest Schoelers, of Asheville, N.C. She just had a tooth pulled. It's the first time that the frisky animal has been down in the mouth in all her 19 years. The rest of her canine crockery is still intact.

FLAX CROP

Less than 30 percent of the world flax crop is used for making linen. Most of the acreage is seed flax, grown for the manufacture of linseed oil and linseed cake.

SHE BAKED A CHERRY PIE — And it won her the title of Cherry Pie Queen. "At home on the range"—most any range—Annette Hunt, 17, of Indianapolis, Ind., gives a taste of a pie made from her prize-winning recipe to J. R. Poteat, of Louisville, Ky., at contest headquarters in Chicago, Ill.

"PUT IT IN THE CIRCULAR FILE"—In this case, the phrase doesn't mean the wastebasket. It refers to the unit being inspected by engineer Bob Wilkins, above, in New York City. Heart of a million-dollar-plus data collecting system, its 2,700 feet of magnetic tape can store and "remember" as much numerical information as can be recorded on some 500,000 punched cards, according to its manufacturers. Built in Newton Highlands, Mass., as many as 100 of the file units can be combined in one system. Electronic devices "search" the ribbons, 10 at a time. Operation is equivalent to processing four million punched cards in less than 10 minutes, it is said.

DISTINGUISHED VISITOR—A model of the B-36, U.S. inter-continental bomber is the focal point of this Pentagon discussion between visiting Italian President Giovanni Gronchi and two of the nation's top air force officers. Discussing the plane and its capabilities are, left to right: Gen. Nathan Twining, U.S. Air Force Chief of Staff; President Gronchi and Gen. Curtis LeMay, commander, Strategic Air Command.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

Start the season right

During the start of any new season of activity, the main thing to emphasize is eliminating the faults that were apparent the season before.

Unless you base your training on this principle right at the start you'll hang onto all your bad points during the coming season too. Right now, your mind and body are fresh. They're able to develop new habits to replace the old ones because the old habits have not been re-established. But if activity is started without any conscious attempt to develop new habits the old ones will return and the longer this continues the worse they will become.

Dean Cromwell, famous U.S. coach, wrote: The athlete should try to work up to a set schedule, emphasizing his weaknesses at all times. Work should be done in front of your coach or another athlete who understands what you are trying to do, so they can advise you of your weaknesses. Remember, your weaknesses are more apparent to someone watching.

Make a list of the weaknesses you want to eliminate. Start to work on making the change right now. Start slowly, and train your mind and body to get the feel of the new way before the pressure goes on.

Post-game jitters

Do you have trouble relaxing and controlling your jitters after a hard practice or game? Here's a trick you can try.

Go for a long walk, concentrating on slow deep breathing. Do this as soon after the activity as possible. When you get home, take a hot bath. When you are in the tub, try to let all your muscles

go as loose and limp as possible. Finally, to ease your mind regarding what you should or shouldn't have done, write down any lessons you think you have learned, and any resolutions you may have about the next game.

These are all tried and true methods of eliminating the strain of fatigue and of easing nervous tension.

Strictly Fresh

Anyone who harbors the illusion that eggs are a perishable food has never experienced the after-Easter durability of hard-boiled eggs.

A wise man never refers to cuddly Easter chicks unless he makes it plain to his wife that he means the kind which grow their own fine feathers.

Springtime is the season when you plan carefully how to avoid all the work you've been shunning all winter while waiting for springtime.

Goldfish are related to the carp. / Salt used as money in Ethiopia.

Here's the Answer

WEEKLY BIBLE COMMENT

MAN HAS GODLIKE ATTRIBUTES

"God saw everything that He had made, and, behold, it was very good." This verse from Genesis is one upon which we may well meditate at this time, when our thoughts are so much upon the life of His Son.

If we could see creation as God saw it, we, too, would know that it is very good. We see it, so often, marred by what man has done—to himself, to his fellow men and even to the world in which he lives. With infinite capacity for building beautifully and well, man has been too often content to live in hovels—spiritual or actual—or to let others live there.

The writer of Genesis, with magnificent vision, faith, and daring, links the Creator with man, made in the image and likeness of God, with the capacity of being himself a maker, or creator.

"God made man in his own image." "Every house is builded by some man, but He that built all things is God." This linking of man with God is logical and sound, and it is the intelligent basis of all true religion.

It is a commonplace of our faith today. But surely it was an inspired man who first perceived and uttered it.

Let us remember that it is through the Jesus of the Cross—the Jesus of the Resurrection—that we may, each of us, regain a measure of worthiness for this unique linkage with the Creator.

AT LAST!

In 1940, Marjorie Johnstone of Sydney, Australia, reported a 1937 Ford stolen. It was 16 years later that detectives located the vehicle. They said the car had changed hands 12 times since the theft. It then took them three days to locate Miss Johnstone. 3186

Seed cleaning on the farm

Problems and methods of cleaning seed on the farm are described in detail in a new 24-page booklet prepared by G. W. Holmes, former agricultural engineer of the Manitoba Department of Agriculture and Immigration.

A section on the various types of machines which belong in a farm seed cleaning plant is fully illustrated, showing fanning mills for cleaning cereal grains, a Carter Disc and Indent Cylinder for some of the more difficult separations and a blanket cleaner especially for cleaning oats.

Working diagrams further illustrate the operation of these machines and the several combinations of them in either an elementary or laborate seed cleaning plant.

Complete contents of the booklet include sections on methods and principles in seed cleaning, seed cleaning problems, the farm plant, farm seed cleaning machines, other specialized seed cleaning machines and care of equipment.

The publication is available free of charge from the Publications Branch of the Manitoba Department of Agriculture, Legislative Building, Winnipeg, or from local agricultural representatives.

A pineapple, if it's green, should be wrapped in paper for 24 hours or longer.

SEEING THE WORLD—Jan Wood and her dog Cindy who recently started on a solo flight by easy stages around the world. A school teacher, Jan has taken a year's leave of absence from her job and will stay for short periods of time at each stop to get acquainted with people of foreign lands. The plane, a Cessna 170B, will be shipped by boat across the Atlantic and Pacific oceans.

Ibadan, sprawling capital of Nigeria, growing too quickly for accurate census

Nigeria, biggest British dependency, recently visited by the Queen, has an area of about 373,000 square miles (four times the size of the United Kingdom) and a population estimated to be not less than twenty-five million. Under a new constitution, elections took place throughout the country in 1951 and Nigeria now has three regional Houses of Assembly (North, East and West) and a central House of Representatives, all largely elected.

There is no question that Ibadan, regional capital of Western Nigeria, is the biggest, truly African city, in all the continent. Just how many people there are living in it no one knows, though current estimates are well over the half million mark. The town is growing too quickly for any census to remain accurate for more than a few days.

Folk are flowing into this sprawling city of corrugated iron roofs and crowded, dusty, market-lined streets at a rate which makes a perpetual headache for the Native authority. Every spare room and every veranda is let to newcomers by the business-like Yoruba citizens. Ibe is the traditional home of the Yorubas and the Oni there is still their senior chief.

Auto insurance safety guide lists change

REGINA. — Saskatchewan drivers were urged by J. A. Christie, Chairman of the highway traffic board to study the Saskatchewan Auto Insurance and Safety Guide which is issued with every driver's license.

Each year there are several changes in the Motor Vehicles Act which are noted in the Safety Guide, and only by giving it some study can drivers keep abreast of developments, Mr. Christie said. The reading time from cover to cover is about 60 minutes.

The Guide contains an outline of safe driving techniques, and in the centre of this year's copy there is a list of offenses for which licenses can be revoked and an explanation of the color license system in effect in the province.

There are many instances each year where motorists who lose their licenses complain that they didn't know certain regulations existed, Mr. Christie said. The Safety Guide is issued to make motorists aware of the regulations so that they will not have to lose their driving privileges.

Mr. Christie noted one typographical error in the first 50,000 copies off the press, which was corrected in later printings. The error, on page 23 shows the stop sign represented as a square, while actually it is a diamond-shaped sign.

But Ibadan has grown into the administrative and commercial centre of "Yorubaland".

Honor Welsh engineer

Above the miles of crowded houses with their sun-blistered, many-hued paintwork is one fine building, a western-style town hall. It is also the unofficial memorial to a Welshman named Taffy Jones. "ORE OMO IBILE YORUBA" says the plaque in the great hall. It means "Friend and teacher of the Yoruba people" and it carries the name of Robert Jones, M.I. Const. E. As "Taffy" he crops up in any conversation with any citizen of long standing in Ibadan.

This district was one of the first to have any degree of autonomy and Jones was the engineer who guided the African councillors through the practical problems of bringing water, light and roads to the city. And whilst Ibadan continues to grow, a new British engineer helps to keep Ibadan's services up to the ever-increasing demands made on them.

The present electricity undertaking runs on wood cut from the forest belt around. Such was the foresight of the Native authority some years ago that the hillsides around the power station itself are clothed in fine plantations of young teak. At present timber is being hauled from 27 miles away and the new boiler installations are planned to run on coal, as does the present steam plant during the wet season. But as the wood cutters progress the planters are never far behind.

Lights are dim in Ibadan now as two 500 kw alternators try to keep pace with the load. Two more 1,500 kw machines complete with modern high-pressure boilers are being built and room is being left for a third. A further two 200 kw diesel sets are coming in as standbys and an automatic coal-handling plant is being planned.

The city's waterworks, one of the most modern in the world, is also finding it hard to cope with the growing demand because of the shortage of power to drive the pumps. Few African houses were built in a way which allowed water to be laid on, but there are stand pipes along the streets. No new standpipes can be erected until the new generators start humming; but such has been the effect of the water system that it is

years since any water-born disease struck the area and the incidence of internal parasites has dropped by more than half.

TRY AND STOP ME!

By BENNETT CLEF

Historians finally have discovered what Lord Godiva said to Lady Godiva when she returned from her famous ride. He was waiting at the door, in a towering rage, and demanded, "Where exactly have you been? Your horse got home two hours ago!"

Have you noticed that no matter how low you may have tuned down your TV set, the commercials come through with a blare that all but tears off your ears? Sponsors, it seems, got hep to the fact that many of you flee to the kitchen or elsewhere when the commercial begins, so now they make darned sure that you can hear them wherever you are!

Mark Twain was lecturing in the midwest United States, it is recorded, when a reporter barged into his bedroom, awakened him from a sound sleep. "Sorry, Mr. Twain," he chirped, "but I gotta catch the noon edition. Tell me: Who's the most interesting American you ever met?" "Aaron Burr," said Twain promptly.

The reporter blinked and said, "Hey, wait a minute. Burr died in 1836, didn't he? And you were only born a year before that. How would you know if he was interesting or not?"

Twain looked very pleased. "You've achieved distinction, young man," he said. "It's the first time to my knowledge that fool paper of yours has discovered an error before publishing it."

A wonderful limerick by Ogden Nash:

"There was a young belle in old Natchez
Whose garments were always in patchez,
When comment arose
On the state of her clothes,
She drawled, 'When ah itchez,
ah scratchez!'"

A litter of the common skunk usually contains five.

BRITAIN TO BE FIRST

Queen Elizabeth to open first U.K. atomic power station

The Queen will officially open Britain's first full-scale nuclear power station at Calder Hall in Cumberland, October 17, when it will be connected with the National Grid System of the Central Electricity Authority. Britain will thus become the first country in the world to have atomic generators feeding energy into the National Electricity Supply System.

Calder Hall is the world's largest atomic power station. It will supply 92 megawatts of electricity and produce plutonium as a by-product for use at the neighboring atomic plant at Windscale. The first "A" station at Calder Hall is expected to become active soon. Meanwhile, work proceeds on a second station, Calder Hall "B", due to be completed by the end of 1958. The project will eventually have a total generating capacity of more than 180 megawatts.

Scientists from the industrial group of the United Kingdom Atomic Energy Authority have combined with scientists at Harwell to form a team which is gaining experience in the running of a fast reactor. Two new research reactors (or atomic piles)—ZEUS and ZETR—are now operating at Harwell. They form part of the United Kingdom's program for investigating different types of reactors.

ZEUS has been built to check the nuclear calculations on which the design of the fast reactor being built at Dounreay in Scotland depends and is in many essentials a full-scale model of the Dounreay reactor. Its core is surrounded by many tons of uranium in which plutonium is gradually formed as the pile runs; it operates at a low power level of only 100 watts so that no cooling is required.

ZETR uses nuclear fuel in solution and is intended to provide information about the quantities of fuel which will be required for large-scale reactors using such solutions. Plutonium has already been studied in this reactor and uranium 235 is now being studied. Various types of reactors are

now operating at Harwell. They include two in which the fuel is natural uranium rods in graphite; one, with plutonium as the fuel, in which it has been shown that two atoms of fissile material can be created for each one burned, and another in which the fuel is contained in heavy water.

Three new reactors are under construction: DIDO and PLUTO, both powerful research tools in which the fuel is contained in heavy water, and LIDO, a "swimming pool" type of reactor in which the fuel elements are in a tank of ordinary water.

:: GEMS OF THOUGHT ::

PARENTAL DELINQUENCY

I don't like to use the words "juvenile delinquency" because I have a very firm conviction that the term ought to be translated into parental failure.

—Dwight D. Eisenhower.

Whence do you derive the power and privilege of a parent, when you, though an old man, do worse things than your child?—Juvenal.

Children should obey their parents; insubordination is an evil, blighting the buddings of self-government.

—Mary Baker Eddy.

Diogenes struck the father when the child swore.—Robert Burton.

If you must hold yourself up to your children as an object lesson, hold yourself up as a warning and not as an example.

—George Bernard Shaw.

The standards of the so-called older generation must be raised before we can expect youth's standards to reach the mark we would all like to see.

—Norman B. Carson.

SHERLOCK HOPE—Where there's a gag, there's hope. The hope is, of course, comedian Bob Hope who arrived at Idlewild airport in New York in a Sherlock Holmes coat and London bobby's helmet. He has just completed a 10-week film stint in England.

OUR COMPLETE SHORT STORY —

CONCENTRATION

—By CLAIRE LAVAL

AND in 1930, the advocates of protection passed the highest tariff bill in the history of the United States, the Hawley-Smoot. Mr. Robert Sullivan, the newest history instructor on the college teaching staff, was lecturing on tariffs.

As he spoke, Janet Laurin appeared to be drinking in his every word. Her eyes followed him as he moved from his desk, to the window, to the board and back to his desk again. But Janet wasn't concentrating at all. She was merely day dreaming — wondering, in fact, how Mr. Sullivan could combine a football-hero build with such a brilliant mind. Certainly men like that weren't plentiful. Mr. Sullivan paused in his speech and looked directly at Janet.

"Miss Laurin, would you please tell us the provisions of the Smoot-Hawley tariff-bill?"

Janet was caught completely unaware. She didn't even hear the question. "I-I'm afraid I didn't hear the question." She was so embarrassed that she stuttered.

Robert Sullivan looked at her thoughtfully, an eyebrow raised. "I'm afraid, Miss Laurin, that you haven't even heard a word I've said for the past fifteen minutes. Y'know, this is the third time this week that you've missed a question."

Janet's face flamed. She could feel the other students looking at her and smiling. "I'm sorry," she said, and slumped down in her chair. She wished the floor would open up and swallow her. The third time in one week that she had missed a question! She must be making a terrible impression on Bob—that was the way she thought of Mr. Sullivan—Bob. Right now, Mr. Sullivan was smiling in the direction of Jill Fischer. Suppose you tell us the provisions of the Smoot-Hawley bill, Jill — I mean, Miss Fischer."

Jill smiled confidently, tossed her golden page boy off one shoulder, and answered correctly. Janet glared at her with envy and dislike. Envy because of her easy relationship with Bob, dislike because she answered correctly. Everyone knew that Jill had already been out with Robert Sullivan and when Jill went out with someone, nobody else had a chance. Tall, slender, glamorous, Jill was the kind of girl any man was proud to be seen with. No doubt, she had Robert Sullivan neatly tucked away under her wing.

Janet sat miserably through the rest of the lecture, thinking of Bob and Jill and paying no attention whatsoever. When the bell rang, she jumped to her feet with a sigh of relief. She felt she couldn't get out of the classroom fast enough. As she reached the door, however, almost escaping, she heard Mr. Sullivan call her.

"Janet Laurin, would you come here for a moment, please?"

Janet stopped in her tracks. She was almost tempted to keep right on going, but she couldn't very well say she didn't hear that booming voice. She turned and

walked back toward the desk.

"Miss Laurin," he said, "I'd like to see you in my office this afternoon after classes, say about five o'clock. Would that be convenient?" He was smiling at her and his blue eyes were twinkling.

"He probably finds my stupidity amusing," thought Janet, but she couldn't resist smiling back at him. "Yes, that would be convenient," she said. "Good," said Mr. Sullivan, "then we can have a little talk about your work. I'll see you then."

"Yes, Mr. Sullivan," said Janet and turned to leave. Then she noticed that Jill, too, had remained in the classroom. Possibly to discuss a history question with Robert Sullivan, but more probably to make a date. For a minute Janet hated Jill with all her heart and soul.

But she soon forgot about her as she turned her mind to the appointment with Bob at five. Perhaps it would be a good idea to go back to the dorm and put on a more attractive dress. After all, it wouldn't do any harm to try to make a good impression with the help of a little glamor. But then, probably all he wanted to tell her was that he was going to fail her in the mid-term exams.

Nevertheless, she changed her dress, put on fresh make-up, and her favorite perfume, and promptly at five, she entered Robert's office. He was sitting with his long legs propped up on his desk and immediately brought them down when she came in.

"I see you're prompt, Miss Laurin," said Robert Sullivan as he pulled up a chair for her.

Janet thanked him, smiled her best smile and tried to toss her hair like Jill did, but it didn't work, her hair wasn't long enough. Mr. Sullivan was leaning against his desk, looking very professional.

"Miss Laurin," he began, "I've been studying your work in my class lately, and I've come to some conclusions that I thought we should discuss."

Janet felt her stomach sink. This is it, she thought. The perfume, the make-up, the dress, all for naught. Now he'll break it to me gently that he finds my work unsatisfactory and that he'll have to fail me. But all she said was, "Of course, Mr. Sullivan."

Mr. Sullivan folded his arms across his chest and continued. "So far, Janet, I've given the class two tests and in both of them you've done quite well. You made B, I believe. You seem to know the material. When I call on you in class, however, you never seem to be able to answer correctly or even at all."

Janet's heart skipped a beat — he had called her Janet! How pretty her name sounded. Janet and Robert, Robert and Janet or better still — Bob and Janet. She turned the words over in her mind. Mr. and Mrs. Robert Sullivan didn't sound so bad either. She smiled a little at her thoughts, while Robert Sullivan spoke on.

"So with this evidence in hand, Janet Laurin, I've come to the conclusion that you're in love."

Janet started from her reverie, her eyes widening. "Why, Bob, I haven't told a soul about it except —" She stopped suddenly, clapping her hand over her mouth. "Oh, I didn't mean to say that," she whispered.

Bob frowned a little. "Am I correct in assuming that your inattentiveness during lecture hours is due to love and not stupidity?"

"Yes, I suppose it is," she said, softly.

"Am I also correct in assuming that during my classes you are thinking about the way 'he' looks, the way 'he' moves his hands when 'he' talks, the way his tie has a trick of sliding over to one side and also wondering what in the world 'he' sees in Jill?"

By this time, Bob was standing over her. Janet looked up into his face. She was so overwhelmed she could hardly speak.

DESERT WARRIOR KNIGHTED BY QUEEN — Lt.-Gen. John Glubb, dismissed by Jordan as commander of the Arab Legion, who was recently appointed by Queen Elizabeth a Knight Commander of the Bath, one of Britain's highest and oldest orders of chivalry. 'Glubb Pasha' was dismissed recently by King Hussein. He flew to London and reported to Prime Minister Sir Anthony Eden.

"Bob, how — how did you know?" I haven't breathed a word to anyone except my roommate."

Bob's face was very close to hers, his eyes twinkling, his lips smiling. "It may be because I'm clairvoyant," he said, "or it may be because I've become very attracted to you, too."

And suddenly, unbelievably, Bob was kissing her. Then just as suddenly, Janet pushed him away. She jumped to her feet.

"Just a minute, Mr. Sullivan! What about Jill? It seems to me that you and that young lady are rather close. You won't be able to give Jill the brush-off so easily."

Bob was laughing. "Jill, my dear, doesn't need a brush-off. She's my oldest sister's daughter. That's why we're so close."

"Your niece!" Jane's tone was incredulous. "Bob, not really! I'm so glad."

Bob's hand was beneath her chin. "That's the truth. And now do you think you'll be able to concentrate in class?"

Janet couldn't help smiling. "Concentrate on what, sir?"

TV WATCHMEN

Night watchmen in Stockholm will soon be covering their beats by television. Tiny cameras mounted at doors and other points will pick up pictures and relay them to television screens placed in front of the watchmen.

Funny and Otherwise

A farmer was driving past the insane asylum with a truck load of fertilizer. An inmate called out:

"Hey! What are you hauling there?"

"Fertilizer," the farmer called back.

"What are you going to do with it?"

"Put it on my strawberries."

The inmate turned around to his room-mate and said: "Huh! We put cream and sugar on ours, and they call us crazy."

If you earn \$4,000.00 a year and your wife earns nothing, she's a dependent. But if your wife earns \$4,000.00 a year and you earn nothing, you're a bum.

A hard-driving taxi driver ignored a red signal, threatened the traffic policeman's knees, missed the street island by a hair, and grazed a bus, all in one dash.

The policeman hailed him, then strolled over to the taxi, pulling a big handkerchief from his pocket en route.

Policeman — Listen, cowboy! On the way back I'll drop this and see if you can pick it up with yer teeth.

Doctor: "Now take a deep breath and say nine, three times."

Willie (after inhaling): "Twenty-seven."

New strategy on vacations

A recognition that the wife and children, not the father, usually decide where the family vacation is to be spent has prompted Minnesota's tourist division to put a new emphasis on vacation promotion.

The new approach emphasizes recreational facilities for the whole family. Formerly the pitch was top-heavy with Minnesota's fishing and hunting attractions, which appeal primarily to the man of the family.

"The mother and kids decide where the vacation will be," the division said. "The old man may think he does, but he usually doesn't."

Judge suggests marital subsidy and baby bonus

Magistrate Kenneth M. Langdon of Oakville, Ont., has suggested government subsidies of from \$3,000 to \$5,000 to young people who want to get married but can't because of financial difficulties.

The magistrate, a judge of the juvenile and family courts for Halton County, told the Oakville-Trafalgar-Bronte Family Service Bureau the subsidies could be made through chartered banks. They could be repaid at low interest rate as soon as the husband reached full earning power.

Couples expecting a baby, he suggested should be given a \$100-a-month bonus after satisfying a means-test requirement. That would enable mothers to stay home and look after their families.

Orientation test

Young couples contemplating marriage should be required to take an orientation test which would indicate whether they are ready to accept the responsibilities of married life.

Unsatisfactory results, especially on the duties of parenthood, should lead to denial of marriage licence for the time being.

Many couples "are attracted physically but they do not realize what a serious step they are about to take."

The marriage test, combined with guidance, would alleviate many common marriages problems.

THREE WEAR NO. 9

The three top right wingers in the National Hockey League this season all wear the same number on the back of their jerseys. They all wear No. 9. The top right wingers are, of course, Gordie Howe, Maurice Richard and Andy Bathgate.

CLASSIFIED

MECHANIC WANTED

WANTED IMMEDIATELY — FIRST class mechanic. Ford products garage. Good monthly wage guaranteed. Give references, marital status. Small town 80 miles east of Edmonton on paved highway, No. 11, main line CNR, sewer, natural gas, power. Apply Hafso Bros. Limited, Viking, Alberta. 2C3186

NURSES WANTED

"REGISTERED NURSES OR GRADUATE Nurses eligible for registration wanted for medical, surgical, obstetrical wards, and operating room scrub nurses, and Nurses Aides with some experience. New wing opening in the near future. For detailed information, write: Superintendent of Nurses, Union Hospital, Moose Jaw, Saskatchewan. 2C—3186-87

Now Many Wear FALSE TEETH With More Comfort

FASTEETH, a pleasant alkaline (non-acid) powder, holds false teeth more firmly. To eat and talk in more comfort, just sprinkle a little FASTEETH on your plates. No gummy, gooey, pasty taste or feeling. Checks "plate odor" (denture breath). Get FASTEETH at any drug counter.

If You're TIRED ALL THE TIME

Everybody gets a bit run-down now and then, tired-out, heavy-headed, and maybe bothered by backaches. Perhaps nothing seriously wrong, just a temporary toxic condition caused by excess acids and wastes. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys, and so help restore their normal action of removing excess acids and wastes. Then you feel better, sleep better, work better. Get Dodd's Kidney Pills now. Look for the blue box with the red band at all druggists. You can depend on Dodd's. 22

Jane Ashley Says

"Corn Starch Makes Creamier Puddings!"

RICE PUDDING

- 1/2 cup uncooked rice
- 4 cups milk
- 3/4 cup granulated sugar
- 3 tablespoons BENSON'S or CANADA Corn Starch
- 1/4 teaspoon salt
- 1 egg, beaten
- 1 teaspoon vanilla

ADD uncooked rice to milk in top of double boiler. COVER and cook over hot water, stirring occasionally, about 40 minutes or until rice is cooked. COMBINE sugar, BENSON'S or CANADA Corn Starch and salt in a bowl. ADD to milk mixture, stirring constantly, until mixture thickens. COVER and cook 10 minutes. POUR a small amount of the mixture over beaten egg; mix well. RETURN to double boiler immediately; cook 2 minutes longer, stirring constantly. REMOVE from heat; add vanilla. SERVE hot or cold. YIELD: 6 to 8 servings.

For free folder of other delicious recipes, write to:

Mr. and Mrs. Emil Gramms and Lorne left Thursday for the long weekend for Portland, Oregon to visit their daughter, Amarylis who is taking her nurses training at the Portland hospital.

Wayne Leiske left Thursday with the Gramms family to go as far as Walla Walla to visit his brother Larry and also the Norman Taylor family.

Visitors at the Chris Roth home and district included their niece the College nurse Madella Gimbel, their daughter Geraldine from Canadian Union College, Mr. and Mrs. Harry Patzer and family of Hanna, Mr. and Mrs. Eldred Roth and family of Arrowwood, Archie Roth of Banff, Miss Sonja Granet of Galahan.

Visitors in the district from Canadian Union College were the Bechthold twins Roland and Ronald; Lyle and Donald Schaber, Donna Harris, Glenda Gimbel, Lee Triebwasser, Leroy Huether, Gloria Thomas, Mr. and Mrs. Algram Fleck and family; Bill Graham, Robert Heinrichs, Mr. and Mrs. Elmer Koronko, Mrs. Vernon Kaiser, Sharon Bechthold.

Vivian Roth and children of Travers, Alta. were visiting her

parents, Mr. and Mrs. Emil Bereth.

Mr. and Mrs. Harvey Bechthold of Calgary were visiting his parents Mr. and Mrs. Theo Bechthold and also at the home of Mr. and Mrs. John Leiske over the long weekend.

Pictures were shown at the S.D.A. Church March 31st. The one film was produced by the American Religious Town Hall Meeting Telecast. The College Nurse of Canadian Union College, Miss Madella Gimbel showed slides of her trip to Alaska. A program was also given. Taking part were Miss Donalda Samu, Jerry Leiske, Geraldine Roth, Donna Harris, Mrs. Earl Chandler Sr.; the male quartet, Elmer Koronko, Marvin Dick, Jake and Courtney Gimbel. A talk was given by Pastor Goertzen on the course by the St. Johns Ambulance and why we should take this course. He himself has taken the course three times and has received the bar. Also Elder Goertzen has had his life saved by the quick action taken from the knowledge of this course.

John Leiske was chairman of the program given at the S.D.A. church March 31 and gave a talk on the Canadian Cancer Drive which takes place on April 16th.

Films were shown in the S.D.A. church April 1st at 8 p.m. by Pastor Goertzen in behalf of the "Signs" campaign.

HORTICULTURAL GUIDE NOW READY

The 1956 Horticultural Guide is ready for distribution. The Guide is specially prepared for Alberta gardens by the Alberta Horticultural Advisory Committee.

The 30-page publication has a map of Alberta showing the Horticultural zones and lists of recommended fruits and vegetables for each zone. The varieties suitable for freezing, general processing and home storage are distinguished from one another. Planting distances and yields are given in many cases. General disease control practices and common insect pests and their control are discussed.

There are recommended lists of annual flowers, perennials and rock garden plants. A short comment is given on the culture propagation and storage of dahlias, gladioli and iris. There is also a section devoted to peonies.

A list of trees and shrubs and recommendations for planting is given.

Ask your district agriculturist for a copy of the 1956 Horticultural Guide.

STILBESTROL TESTS AT UNIVERSITY OF ALBERTA

Faster gains and lower feed

needs were reported by Dr. L. W. McElroy, Professor of Animal Science, from the use of Stilbestrol in a feeder cattle ration in a 16-week test now drawing to a close at the University of Alberta. The amount fed was 10 milligrams of stilbestrol per day per steer in 1 pound of protetin supplement. The five steers under test have made about 15 per cent faster gains and required 12 per cent less hay and 11 per cent less grain per pound of gain. These figures are about average of results reported elsewhere, Dr. McElroy advises.

Stilbestrol was first released in the United States about 18 months ago and is now being used on over 50 per cent of the feedlot cattle there. With its recent release in Canada, use of stilbestrol can be expected to increase rapidly. But care will have to be exercised, Dr. McElroy warns. Regulations will be widely publicized and any company that introduces the feed will indicate clearly under what conditions it will be used and how much is to be used.

The manufactured stilbestrol is about four times as potent as the natural hormone and use of feeds containing stilbestrol will be limited strictly to feedlot cattle. They must not be used for dairy stock nor for any cattle under 600 lbs. Feed it according to directions, advises Dr. McElroy, and take care that the breeding herd, by accident or otherwise, do not get into this feed. Experience with and use of stilbestrol will be among topics discussed this year when stockmen meet on June 2 for the 35th Annual Feeders' Day at the University of Alberta.

INTENDED ACREAGE OF PRINCIPAL FIELD CROPS IN ALBERTA IN 1956

On the basis of their intentions at March 1, Alberta farmers plan to seed an unprecedented acreage to flaxseed in 1956. 555,000 acres or 224 per cent of the area seeded in 1955 will be seeded to flax in 1956. Alberta farmers also indicated increases in oats for grain and mixed grains while a decreased acreage is planned for spring wheat, barley, spring and fall rye and potatoes. The acreage planned for summerfallow remains the same.

The Dominion Bureau of Statistics has recently released the intended acreage figures for Canada and at this time pointed out that these acreages were

ANGLICAN LADIES MEETING

The Drumheller Detenry W. A. met at Acme on Wed., April 4th. The Service of Holy Communion was celebrated in St. John's Church, Acme at 11:00 a.m. by Rt. Rev. G. R. Calvert Bishop of Calgary, who also preached on the reality of the Resurrection as the Hope of the World.

Lunch was served at the Memorial Hall by the Acme Anglican W.A. and the business meeting was then held in the Lodge Room. A Deanery Constitution was discussed in detail. Mrs. Bastin of Red Deer was the principal guest speaker. She stressed the importance of study groups and missionary work and warned against too much time being spent on fund raising work.

Owing to the resignation of Mrs. D. Bramley of Carbon for health reasons, Mrs. F. Emery was elected secretary, Mrs. P.

Hanslip was elected vice chairman. The meeting was conducted by Mrs. G. Lewis, wife of Canon E. H. Lewis of Drumheller. Mrs. G. R. Calvert was among the visitors from Calgary. Representatives present from Stettler, Castor, Coronation, Hanna, Drumheller, Three Hills, and Carbon were present.

At the same time as the ladies meeting the Drumheller Deanery Chapter met with the Bishop in home of Mr. and Mrs. Emery. Present were Canon Lewis of Drumheller, Rev. P. Glover of Stettler, Rev. C. M. Starr of Hanna, Rev. G. Scovell of Castor and Rev. J. G. Roberts.
